

NEW Master of Science in Athletic Training

SUMMER 2019 Inaugural Class

Athletic Trainers (ATs) are health care professionals who render service or treatment, under the direction of or in collaboration with a physician, in accordance with their education and training and the states' statutes, rules and regulations. As part of the healthcare team, services provided by ATs include injury and illness prevention, wellness promotion and education, emergent care, examination and clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions.

Where do Athletic Trainers work?

ATs treat a range of patients and work in a variety of settings:

- College/University
- Professional Sports
- Secondary Schools
- Higher Education
- Emerging Settings
 - Performing Arts
 - Physician Practice
 - Public Safety
 - Military
 - Occupational Health
 - Health Care Administration

Job Outlook:

According to the Bureau of Labor Statistics, athletic training is expected to grow by 23% by 2026. Demand for athletic trainers is expected to increase as people become more aware of the effects of sports-related injuries, and as the middle-aged and older population remains active.

Why Stony Brook?
